TRAINING PROGRAMME (KEPT)
DATA PROTECTION AND CYBERSECURITY
TRAINING CALENDAR 2025**

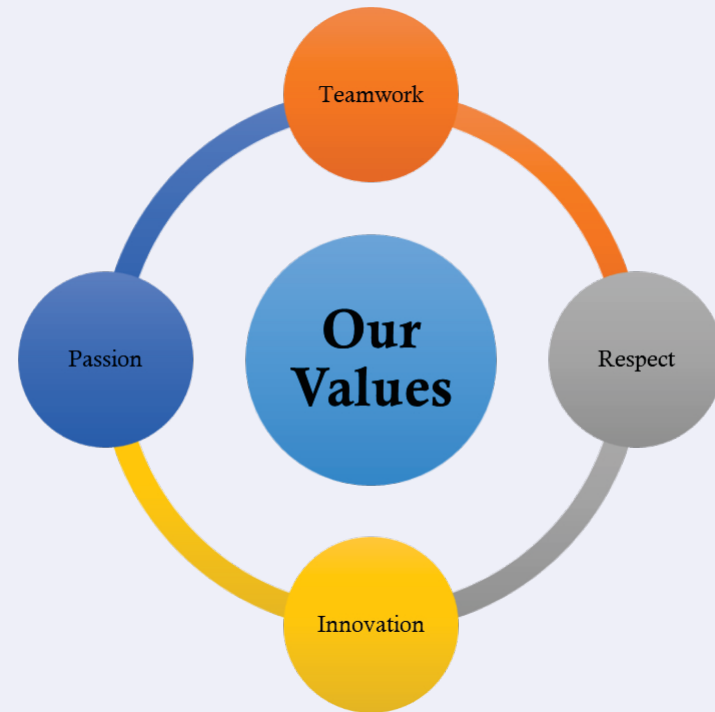

ABOUT COMPANY

South-End Tech Limited is a Data Protection Services, Data Governance Solutions, Cybersecurity Solutions, and Digital Consulting Company. South-End Tech Limited provides services and solutions to corporate entities (profit and not-for-profit) by supporting them in navigating today's and tomorrow's data governance and data protection concerns, automating error-prone tasks, reducing risks, and strengthening customer trust.

Vision: "To promote building trust in data and cyberspace."

Mission: "We support the world in ensuring responsible use of data and safe cyberspace for all."

South-End Tech Limited is a Data Protection Services and Solutions, Cybersecurity Managed Services Provider (MSP), Managed Information Technology (IT) Services Partner, and Digital Consulting incorporated in Kenya under the Companies Act of 2015.

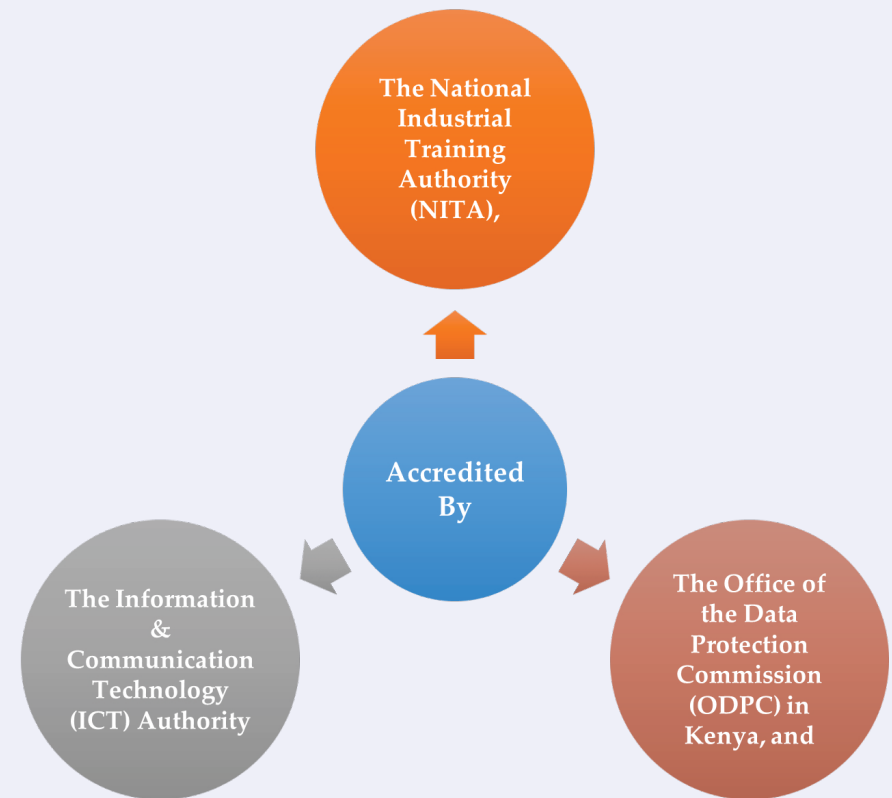

Why choose us?

South-End Tech Limited prides itself as a data protection, privacy and cybersecurity hub for Africa and the global south with competent and certified Cybersecurity & IT Risk teams possessing global certifications including Certified Information Systems Security Professional (CISSP); Certified Ethical Hacker (CEH); Certified Information Systems Auditor (CISA); GIAC GIAC-certified Incident Handler (GCIH); and Systems Security Certified Practitioner (SSCP) among other.

South-End Tech Limited Data Protection, Cybersecurity & IT Risks Project Teams are multi-disciplinary, multi-skilled teams supported by Data Scientists, Data Governance Analysts, and Data Protection Specialists team with international accreditation and certifications (CIPP/E, CIPM, FIP, CIPP/US, and CIPT). We gained credible experience in providing data services, data protection, data privacy, and cybersecurity services since 2019 across Eastern Africa (Kenya, Uganda, Rwanda, Tanzania), Southern Africa (Malawi, Zambia, Zimbabwe, and South Africa), and Europe.

South-End Tech Limited is duly accredited by the following authorized Government Regulatory authorities:

Why Flexi Data Protection and Cybersecurity Webinar Series?

The South-End Tech Flexi Data Protection and Cybersecurity Webinar Series is a flagship sensitization and awareness creation project that has been running monthly since the year 2022. The platform has managed to reach out directly to over 35,875 direct audiences and millions of audiences via our social media platform channel recordings. Our panel of speakers are global experts sourced from practitioners and government authorities.

If you are interested in facilitating a session as a speaker reach out to us via: info@southendtech.co.ke

Knowledge Exchange Programme Training (KEPT) Approach

At South-End Tech Limited, our team of professionals deliver the training using a blend of the following methods:

- a. In-Person Workshops: Focus on interactive exercises, simulated exercises, hands-on use of security tools, and team-based problem-solving activities.
- b. Virtual Learning Sessions: Delivered via a secure platform to accommodate employees in various locations. These sessions will include live expert lectures, Q&A sessions, and real-time polls.
- c. Self-Paced Learning: Interactive e-learning modules with videos, quizzes, and downloadable guides to allow employees to study at their own pace, reinforcing the concepts covered in live sessions. This may be from learning websites or online resources.

South-End Tech Limited deploys the Kirkpatrick Model, the best-known model for analyzing and evaluating the results of training and educational programs. It takes into account any style of training, both informal and formal, to determine aptitude based on four levels: Reaction level that measures how participants react to the training (e.g. satisfaction); Learning level to analyses if participants truly understood the training (e.g. increase in knowledge, skills, or experience); Behavior level to looks if participants are utilising what they learned at work (e.g. change in behaviors); and Results level to determine if the material had a positive impact on the business/organization

To test the effectiveness of the training using this training methodology, participants will be issued a pre-assessment before the training and a post-assessment upon completion. Post-training assessments and evaluations will be conducted to measure the effectiveness of the training. Our KEPT provides customized handouts and reference

materials to the participants. Participants also have access to industry-recognized online learning portals as well as websites, which offer a variety of cybersecurity courses, practical labs, and certification tracks. These platforms provide flexible learning options, including video tutorials, interactive exercises, and hands-on virtual environments, allowing participants to learn at their own pace and deepen their expertise in real-world scenarios. Further, our KEPT facilitators use real-world case studies and tools for practical learning.

Knowledge Exchange Training Benefits

South-End Tech's organization-wide approach to learning ensures your employees develop their personal and professional skills allowing them to engrain data protection & cybersecurity measures and protect your organization's reputation for more business, profitability, and sustainability. Our training programme benefits your organization by helping you build a strong BRICK culture.

- a. Building a cybersecurity and data-driven organization;
- b. Realizing the value of Cybersecurity and Data Protection for your organization;
- c. Inculcating data protection and cybersecurity practices in delivering value for money results;
- d. Cybersecurity awareness for safe cyberspace for business; and
- e. Keeping your data subjects safe is a fundamental human right.

Are you ready to take the next step and become a trailblazer in your Data Protection and Privacy journey? Join other organisations and peers in promoting a BRICK culture and unlock your full potential. Let us work together in shaping a safe cyberspace for all.
